About the Author

Beverly Plass, M.A., CCC-SLP, is a speech-language pathologist in the Irvine Unified School District in Irvine, California, and in private practice. She has worked with adolescents with developmental disabilities for the past 14 years. She has found that the key to student success is tied to their ability to understand and communicate about living, working, and playing.

Functional Vocabulary for Adolescents and Adults is Bev's fourth publication with LinguiSystems. She is also the author of SPARC-R & S, SPARC-Artic Junior, and SPARC-L.

Dedication

Thanks to my students for sharing their love for life

Acknowledgments

I’d like to thank three outstanding teachers: Carol Constantin, Carlon Fagan, and Liz Krogsdale for modeling creative and productive ways to teach functional curriculum to young adults with developmental disabilities. I am fortunate to have collaborated with them over the past 14 years. I am grateful to them for what I have learned and how it significantly influenced the development of this book.

**Vocabulary During Leisure Activities**

I once had two students who did job training at a nursery. They filled pots with soil and planted cuttings into each pot. Thirty-six pots were arranged in a flat. One student worked steadily and completed 10-12 flats in a two hour period. He was a quiet guy. He would respond with one- to two-word utterances if prodded, but he preferred to stick to his work. The young lady, however, was overly friendly. Each day, she greeted the co-workers with a loud, “I'm so glad to see you! What have you been up to?” She often stopped working to chat with the other workers. At the end of the two-hour period, she typically completed one to two flats.

At the end of the year, the nursery owners offered paid employment to one of the workers, which was the ultimate goal of our job training program. We assumed the job would go to the hardworking, productive young man. Instead, the owners chose the young lady because they felt that they could talk to her.

I later read studies supporting the idea that employees who can communicate effectively at work are more successful at keeping their jobs. That is why I feel it is imperative to teach functional vocabulary to teens and young adults with developmental disabilities.

Functional Vocabulary for Adolescents & Adults helps speech-language pathologists and special education teachers teach clients to understand and communicate about daily living. You can teach vocabulary related to the home, the community, work, and leisure activities. The lessons are geared toward clients with developmental disabilities, autism, and/or English as a Second Language. The flexible format allows you to cater the lessons to a wide range of ability levels.

Receptive tasks are appropriate for your clients who are non-verbal or new to learning English. These activities allow the client to hear the target vocabulary words several times, respond by pointing, and apply the knowledge to real situations. The receptive tasks also include a “visual memory” component, which helps clients learn to communicate about things not present.

Expressive tasks begin with simple picture-naming, sentence imitation, and sentence completion. This allows clients with autism and clients beginning to use short utterances to use the vocabulary in simple sentences. The expressive tasks then expand to identifying categories, explaining functions, sequencing events, and recalling information. The recalling tasks are to help clients visualize and discuss things not present. Expressive activities allow clients to use the vocabulary during meaningful and functional activities. At the highest level, critical thinking and problem solving questions allow the client to use the new vocabulary while thinking of solutions to real-life predicaments.

You do not need to follow the units in this book sequentially. You can collaborate and choose lessons that correspond with classroom units. For example, if the class is going to the grocery store, you can use the units about nutrition, mealtimes, grocery shopping, and the grocery store. If your clients are visiting job sites, you can use the units that correspond to the occupations they’ll be observing and the places in the
community they'll be visiting. Note: In the Vocabulary at Work section, I used the Dictionary of Occupational Titles (United States Department of Labor – Fourth Edition, Revised 1991, which is available online at www.oalj.dol.gov/libdot.htm) as a reference when determining how to label the job titles that are featured in this book. Feel free to modify the terminology so that it fits your program or the job titles available in your area.

For any unit, you do not need to ask all of the questions in each section. One client may focus on understanding the vocabulary while another client practices using the vocabulary in various sentences and answers questions. A third client can target problem solving tasks using the same topic. You can also modify the expectations for any task. For example, in the Expressive Vocabulary section of a unit, you may ask one client to recall all six pictures and another client to recall only three pictures. The flexibility allows you the freedom to meet the individual language needs of your clients across all of the topic areas.

You may also use the pictures in this book for other activities:

- Copy the pictures onto card stock. Cut them out and laminate them to use for picture communication books.
- Have clients create personal dictionaries by adding a picture page to their folders each time they learn new words.
- Use the community pictures to have clients help plan the next Community-Based Instruction.
- Use the vocational pictures as a job interest survey.
- Use the pictures during a scavenger hunt while on Community-Based Instruction.
- Have clients practice expanding utterances, using clear articulation, using appropriate voice levels, and speaking fluently.

*Functional Vocabulary for Adolescents & Adults* helps you teach your clients the terms they need to be successful in everyday life.
